Engagement File Update

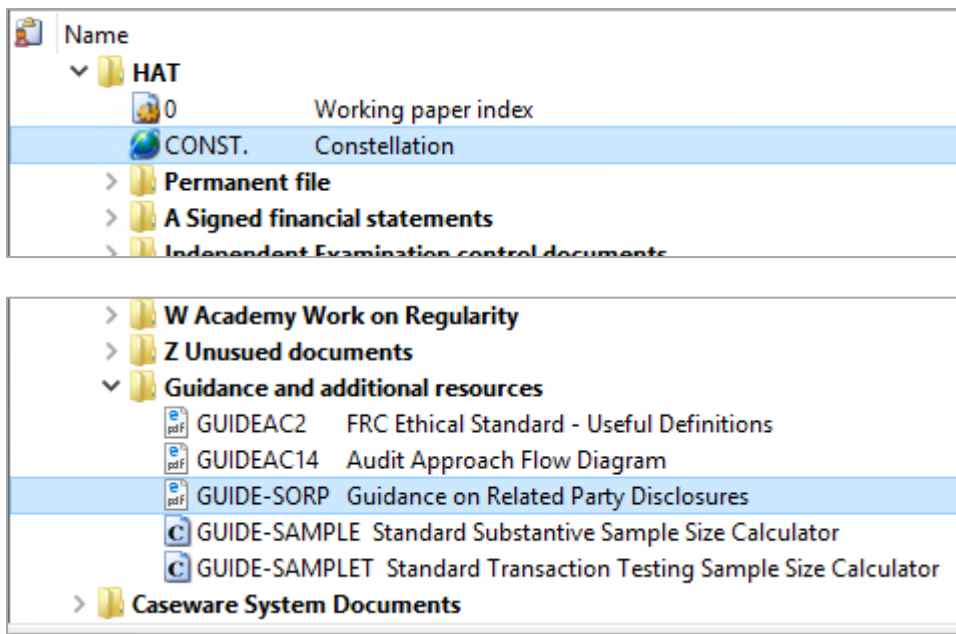

v18.0.01 to v20.0.00

## FURTHER INFORMATION FOR THE V18.0.01 TO V20.0.00 UPDATE

### Adding documents not included in the update

Depending on the template version of the current engagement file, the CONST. and GUIDE-SORP documents may need to be added to the engagement file. This can be done via replacing the documents in the engagement file with versions from the Document Library.

### Adding the Audit Response Table to Work Programmes

In the v20.0 templates the Detailed Audit Response Table has been enabled to provide assistance in identifying which assertions are being covered by procedures selected. To access this function when converting from v18.0 based engagement files this will need to be turned on manually in each Work Programme.

To do so, locate the 'Areas' menu in the Work Programme freeze and selected 'Detailed Audit Response'
