## Supported Environments

The following environments are supported:

- Virtual Machine
- Both physical and virtual platforms are supported and you can connect via RDP (Remote Desktop).

## Administrator Privileges

This software must be installed with administrator privileges.

## Technical Notes

- The machine on which you install CaseWare Network License Server must have a static hostname and a static IP address.

### **Important**

Do not install CaseWare Network License Server on the same machine as your CaseWare network product (e.g., IDEA) as it could corrupt the licensing system.
