## 

## Installing Caseware Electronic Licencing Version on a Server

The 'Network Licence Server' is used to host licences on a server which will then assign licences to the users connected to the server directly via remote connection.

The 'Network License Server' can also provide Licences to users that have Caseware installed on their local machines as long as they are connected to the server that holds the Licences.

Install the Caseware 'Network Licence Server' found within the Caseware Working Papers program link.

Install the 'Network Licence Server' on the central server that is accessible by all local user machines or hosted application servers.

## Exit

Proceed through the Install Shield wizard in order to Install the Sentinel RMS Licence Manager 8.5.5 as shown below.

Click on START, CaseWare International and Get Locking Code

Alternatively access the file directly in file explorer under C:\ProgramData\Microsoft\Windows\Start Menu\Programs\CaseWare International\License Server.

Email a screen shot of the locking code to Sales@caseware.co.uk

Sales will return an authorisation code to Licence the software once the locking code is received.

Once an authorisation code is received apply this to the server.

In order to apply the Licence to the server access the "Licence Manager"

Click on start all Programs CaseWare international then click on "Licence Manager"

×
